ZOMATO LANDING PAGE CLONE (HTML & CSS)

INTRODUCTION :

For my project, I created a Zomato landing page clone using HTML and CSS. As a student learning web development, this project helped me understand how real websites are designed and built. I tried to recreate the main sections of the Zomato homepage, such as the navigation bar, search area, images, and footer. This project gave me a chance to practice writing clean HTML code and using CSS for styling and layout. It was a great way to apply what I've learned in a creative and practical way.

```

Conclusion:

In conclusion, creating the Zomato landing page clone was a great learning experience for me as a student. It helped me understand how websites are structured and styled using HTML and CSS. Through this project, I improved my design skills and gained more confidence in building web pages. It was a fun and educational way to apply what I've learned in web development.
